OBJECTIVE

Computer Science and Engineering graduate with strong knowledge of Java, Spring Boot, SQL, and web development. Experienced in developing full-stack applications using Spring Boot and the MERN stack through hands-on projects. Seeking an entry-level Java Developer role to apply my technical skills, continuously learn, and contribute to building scalable software solutions.

EDUCATION

Shridevi Institute of Engineering and Technology <i>Bachelor of Engineering in Computer Science and Engineering</i> CGPA: 7.81	2022 – 2026 <i>Tumakuru, India</i>
---	--

Government Pre-University College <i>Pre-University College (PCMB)</i>	2020 – 2022 <i>Turuvekere, India</i>
--	--

Government High School <i>Karnataka State Board (KSEEB)</i>	2017 – 2020 <i>Turuvekere, India</i>
---	--

TECHNICAL SKILLS

Languages: Java, JavaScript, SQL, C

Core Java: OOPs, Collections, Exception Handling, Arrays, Strings

Frameworks: Spring Boot, React.js

Web Technologies: HTML5, CSS3, RESTful APIs

Databases: MySQL, PostgreSQL, MongoDB

Developer Tools: Git, GitHub, Maven, Postman, Eclipse, VS Code

PROJECTS

FarmTech: Smart Agriculture Equipment Sharing Platform | *React.js, Spring Boot, MySQL, Java, REST API, Maven*

- Developed a farmer-to-farmer equipment rental and leasing platform that reduces machinery ownership costs through resource sharing.
- Designed a responsive React.js frontend enabling seamless navigation, dynamic equipment browsing, and improved user experience.
- Built RESTful APIs using Spring Boot with JPA/Hibernate and designed normalized MySQL schemas for users, equipment listings, and bookings.
- Implemented secure authentication, equipment listing management, search/filtering, and booking functionalities for efficient machinery rentals.

SplitEase: Group Expense & Grocery Price Comparison App | *React.js, Node.js, Express.js, MongoDB* | GitHub 

- Built a full-stack MERN application for group expense tracking with real-time debt calculation and balance management features.
- Implemented JWT-based authentication and protected RESTful APIs for managing groups, expenses, settlements, and grocery products.
- Integrated Multer-based receipt uploads and cash settlement features to simplify expense management and debt reduction workflows.

E-Commerce Platform: Full Stack Shopping Application | *React.js, Node.js, Express.js, MongoDB, JWT, REST API*

- Developed a full-stack e-commerce platform with product browsing, cart management, and secure user authentication functionalities.
- Built RESTful APIs and integrated MongoDB database for product, user, and order management operations.
- Designed a responsive frontend with dynamic product filtering, checkout workflow, and seamless user experience.
